Issues

1. Under what authority is a request for medical fee dispute resolution considered?
2. Did the requestor bill the disputed service in accordance with 28 Texas Administrative Code §133.10?

Findings

1. The requestor provided services in the state of Tennessee on October 18, 2010, to an injured employee with an existing Texas Workers' Compensation claim. The requestor filed for reconsideration and was denied payment after reconsideration. The requestor was not satisfied with the respondent's final action. The requestor filed for dispute resolution under 28 Texas Administrative Code §133.307. The dispute is to be decided under the jurisdiction of the Texas Workers' Compensation Act and applicable rules.
2. The respondent denied reimbursement for the disputed ASC services based upon billing of an invalid code. A review of the submitted medical bill and EOBs indicate that the code billed was "0490" on the January 18, 2011 EOB.

The requestor resubmitted the bill and used code 99070-"Supplies and materials (except spectacles), provided by the physician over and above those usually included with the office visit or other services rendered (list drugs, trays, supplies, or materials provided)."

On the Table of Disputed Services the requestor lists code 62310-"Injection(s), of diagnostic or therapeutic substance(s) (including anesthetic, antispasmodic, opioid, steroid, other solution), not including neurolytic substances, including needle or catheter placement, includes contrast for localization when performed, epidural or subarachnoid; cervical or thoracic" as the disputed service.

The Operative report indicates that the claimant underwent a cervical epidural steroid injection on October 18, 2010.

28 Texas Administrative Code §133.2(2) states "Complete medical bill--A medical bill that contains all required fields as set forth in the billing instructions for the appropriate form specified in §133.10 of this chapter (relating to Required Billing Forms/Formats), or as specified for electronic medical bills in §133.500 of this chapter (relating to Electronic Formats for Electronic Medical Bill Processing)."

28 Texas Administrative Code §133.20 (c) requires "A health care provider shall include correct billing codes from the applicable Division fee guidelines in effect on the date(s) of service when submitting medical bills."

The requestor billed code 0490 an invalid code not recognized in 28 Texas Administrative §133.20 (c). Secondly, the requestor billed code 99070 incorrectly for billing ASC services for a cervical ESI. The Division concludes that the requestor did not bill for the disputed services with a CPT code required by 28 Texas Administrative Code §133.20 (c). Furthermore, the requestor did not support position that the service listed on the Table of Disputed Services, CPT code 62310, was ever submitted to the respondent prior to seeking medical fee dispute resolution. For these reasons, reimbursement is not recommended.

Conclusion

The Division would like to emphasize that individual medical fee dispute outcomes rely upon the evidence presented by the requestor and respondent during dispute resolution, and the thorough review and consideration of that evidence. After thorough review and consideration of all the evidence presented by the parties to this dispute, it is determined that the submitted documentation does not support the reimbursement amount sought by the requestor. The Division concludes that this dispute was not filed in the form and manner prescribed under Division rules at 28 Texas Administrative Code §133.307. The Division further concludes that the requestor failed to support its position that reimbursement is due. As a result, the amount ordered is \$0.00.

ORDER

Based upon the documentation submitted by the parties and in accordance with the provisions of Texas Labor Code §413.031, the Division has determined that the requestor is entitled to \$0.00 reimbursement for the services in dispute.
